Career Summary

Software Engineer with 3 years of experience in developing **fullstack web apps** and **cross-platform mobile and desktop apps** across multiple industries, **spanning foodtech, fintech, and e-commerce**. Skilled in building **real-time applications** and **managing cloud services**. **Lead large projects and managed team of developers** while leveraging cutting-edge technologies to deliver high-quality products.

Skills

Proficient In: [JavaScript](#), [TypeScript](#), [ReactJS](#), [React Native](#), [NodeJS](#), [NestJS](#), [ExpressJS](#), [NextJS](#), [HTML5](#), [CSS3](#), [TailwindCSS](#), [Git](#), [GitHub](#), [AWS](#), [PostgreSQL](#), [Firebase](#), [MongoDB](#), [Prisma](#), [Web Socket](#), [WebRTC](#), [Data Structure and Algorithm](#), [debugging](#).

Familiar With: [OpenAI API](#), [Stripe](#), [GoogleCloud](#), [Docker](#), [Figma](#), [Web Crawling](#), [Shell](#), [CI/CD](#), [Jest](#), [testing](#), [Distributed System](#).

Work Experience

Software Engineer | Dynt | [dynt.ai](#) in Amsterdam, Netherlands

June 2023 - present

Leading the development of Dynt's open banking integration and finance and expense management solutions.

Tech Stack: TypeScript, ReactJS, NodeJS, ExpressJS, React Native, Prisma, PostgreSQL, Stripe, Open Banking API

- Integrated Yapily API for open banking services, providing secure accounts data access and payment initiation for customers across **30+ European banks and financial institutions**.
- Engineered an **automated invoice and bill processing system with OCR**, decreasing processing time by 85% with detailed accuracy.
- Created a robust **expense management system with real-time approval workflows**, enabling efficient management of employee spending, streamlining expense management and enhancing transparency for businesses.
- Developed a **corporate card issuance system, utilizing Stripe's API** for seamless generation and management of corporate payment cards.
- Introduced **advanced automation workflows for categorization and reconciliation tools** to match transactions seamlessly, reducing manual workload by 90%, enhancing efficiency in financial tracking and ensuring accurate financial records.
- Implemented customizable dashboards and analytics tools, facilitating actionable insights into financial performance for businesses.

Software Engineer | Possier | [possier.com](#) in Chennai, India

April 2022 - May 2023

Led the development of Possier 2.0, a trending restaurant billing POS software in India, while also spearheading the creation of Fuvii, an experimental video commerce platform and food marketplace for foodies.

Tech Stack: TypeScript, NextJS, ReactJS, NodeJS, NestJS, React Native, Tauri, Prisma, PostgreSQL, MariaDB, WebSocket, WebRTC

- Single-handedly designed and implemented a cross-platform POS management system with **real-time data synchronization for 200+ clients**, enhancing efficiency and customer experience.
- Developed a robust offline ordering desktop app by embedding NodeJS and MariaDB into windows binary, ensuring uninterrupted service and **increasing system's reliability by 50%**.
- Reduced AWS cloud operation costs by 70%** and improved system performance by managing EC2, S3, and Lambda services.
- Integrated **Stripe, Google Maps, and Twilio API** to facilitate payments, location tracking, and SMS notifications.
- Built a video commerce platform Fuvii, with **React Native and Java**, achieving a 90% reduction in video streaming load times, while enabling full fledged eCommerce ordering capabilities and real-time order updates.
- Architected a complex database system using advanced **data modeling techniques such as many-to-many and self-relationships, foreign keys, joins, indexing, and normalization** to improve system performance and data accuracy while accurately representing business requirements.
- Developed and implemented a comprehensive customer support system, **including CRM, loyalty, feedback, and support ticket modules**, resulting in improved customer retention and satisfaction.

Founder | CodeFiz | [codefiz.com](#) in Dhaka, Bangladesh

Jan 2022 - present

Built CodeFiz as a next generation code collaboration tool to easily and smoothly hold live coding sessions and coding interviews.

Tech Stack: JavaScript, React js, Node js, Web Socket, WebRTC, HTML5 Canvas, Styled-components.

- Conceptualized, built, and launched the product in **less than two months**.
- Designed a highly customized frontend with **modern UI design patterns, resizable components and responsive interface**.
- Integrated a feature rich shared workspace with **real-time video calling, live code editor and compiler, a canvas and a document editor**.
- Engineered a real-time Node.js backend with WebSocket support, asynchronous task execution, and parallel compilation of user input code.

Full Stack Developer | Weekend Trend | [weekendtrend.com](#) in Dhaka, Bangladesh

July 2021 - March 2022

Designed and developed the e-commerce application of the company from start to finish with utmost user-happiness, security and cost-effectiveness in mind.

Tech Stack: TypeScript, React js, Next js, Node js, Firebase, Styled-components.

- Built a highly performant and interactive web application that scores **90+/100 on Google Page-speed benchmark and loads under 500ms**.
- Integrated a custom content management system for monitoring sells and orders, **increasing the sales team's productivity by 50%**.

Education

BSc in Programming and Data Science

Jan 2023 - June 2026

Indian Institute Of Technology (IIT), Madras

Note: I Initially joined a business degree program back in 2020 but dropped out of it in 2022 to pursue my passion in software engineering.
